Watchlog - Template Wording Review

Oct 21, 2026 · @Jakob

This is every template in Watchlog, with the exact wording it writes. Please mark anything you'd change in the Notes column. Once the wording is approved, it goes in the shared file on SharePoint and every bay uses it.

Anything in [square brackets] is a box the operator fills in. Text after a colon, like [Location: Main Entrance], is what the box fills in unless it's changed. Boxes that pick from a long list are explained in the table at the end. A box left empty prints XXXXX, so a missing detail is easy to spot. Entries from `;fill`, `;mfill` and `;bv` can list several tables or machines in one log.

Incidents and reviews

Code	Template	What it writes	Notes
`;jack`	Jackpot	Operations Supervisor advised of a $[Amount] Supervisor Jackpot @[Machine]. Review confirmed winner. Patron requested to be paid all cash at window #[Window #]. Slot Attendant was observed paying patron @[Time paid].
